

GO SERVERLESS

THE FUTURE OF PARKING SCALABLE AND FLEXIBLE

Start with Symphony Mesh or jump right into the Cloud and always be open to whatever the future brings!

Symphony Mesh as well as Symphony Cloud Solutions make everyday life for owners and operators of parking facilities a lot easier as they simplify the management significantly. Calls from barriers and ticket machines can not only be answered with an Intercom station, but also conveniently with the Symphony App on any smart device, telephone or even in a web browser using our Web Client. Flexibility and scalability are seamlessly combined with the highest performance for security and system availability.

BARRIER, GATE, OR TICKET VENDING MACHINE

Let's talk - with the best possible speech intelligibility and cybersecurity, but now without a server!

THIS IS WHAT YOU CAN BENEFIT FROM

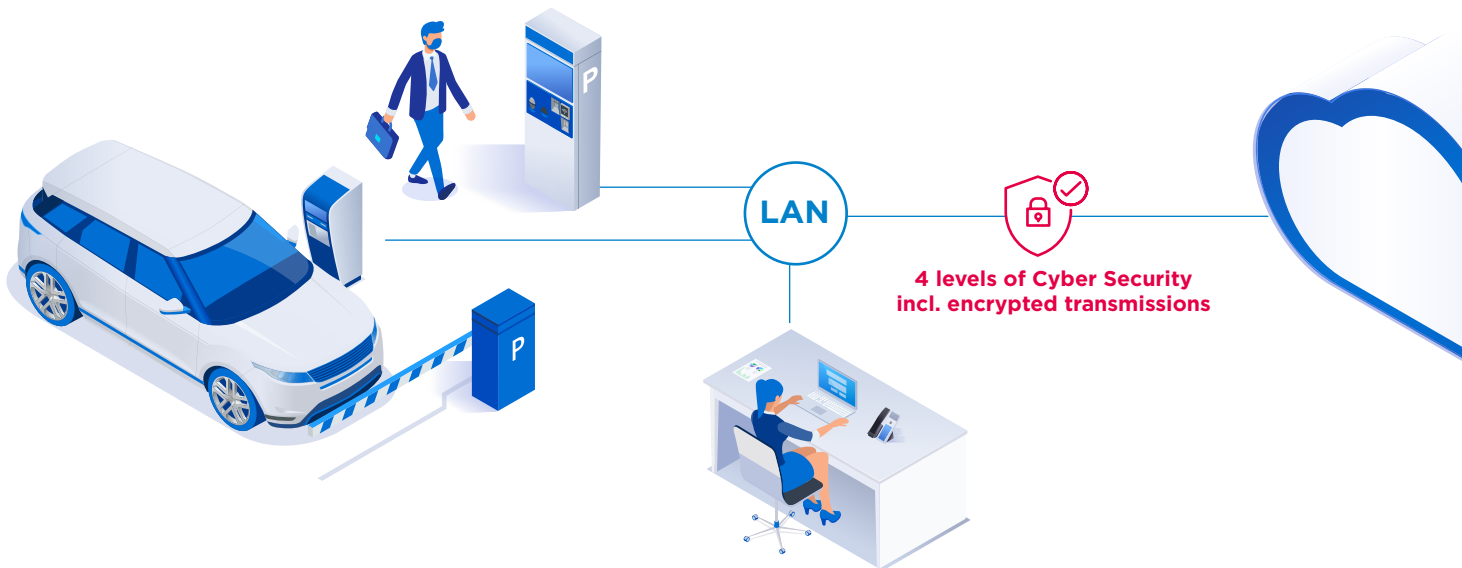

- Maximum flexibility. Never miss a call again. You can conveniently answer calls on your smartphone or tablet and open gates, barriers and doors no matter where you are
- No need for central control centers and/or receiving stations
- Fast implementation and simple configuration.
- Easily scalable - start small and grow big without any complex system restructuring - you can add or reduce subscriptions whenever needed
- No server, little hardware and minimum costs
- Highest cyber security standards
- High audio quality with best possible speech intelligibility
- Same functionalities that come along with server-based solutions

THIS SOLUTION IS PERFECTLY SUITED FOR

- Car Parks
- Business campuses
- Hospitals
- Multi-tenant buildings
- Companies and public buildings

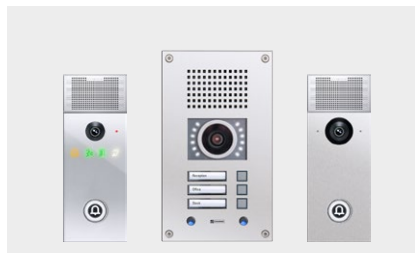

START LOCAL WITH SYMPHONY MESH

IP devices form an independent and smart communication network at the local site (LAN). Calls can be answered from an operator on site without the need for a server.

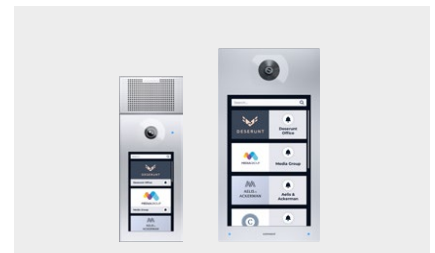

Build-in Modules

IP-Intercom modules for integration into barriers, ticket vending machines and other equipment.

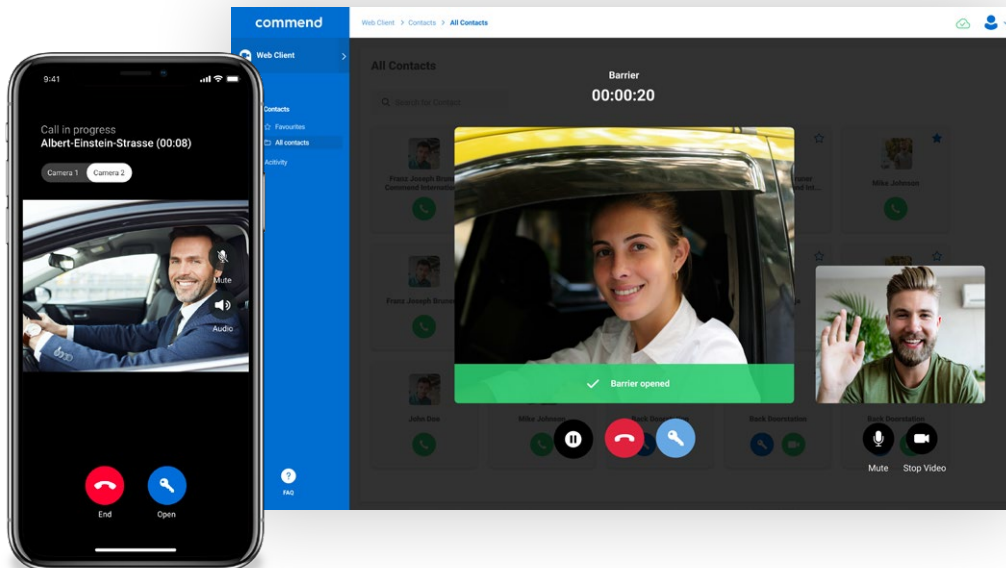

Intercom Stations

Weather-proof IP-Intercom stations with camera for up to three call targets and perfect for small applications.

Touchscreen Stations

Weather-proof IP-Intercom stations with touchscreen are the first choice for applications with many call targets.

SYMPHONY CLOUD SERVICES

MAXIMISE YOUR FLEXIBILITY WITH SYMPHONY

Cloud-based communication solutions provide greatest flexibility. Via the Symphony App and the Web Client you can easily take on calls without being present in the office or the control room. This ensures that every call is answered at any time, even if the entrance, garage or parking lot is unmanned.

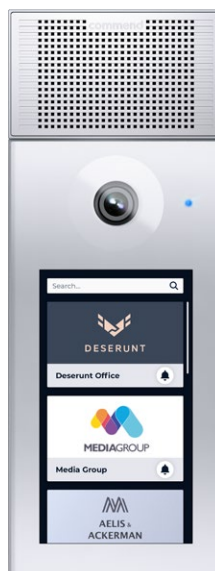

EASILY SCALABLE AND FIT FOR FUTURE

When the solution grows, the system grows with it and it is also easy to connect cloud solutions to a larger overall system and control centre. Perfectly prepared for flexible reporting and digital assistance. Let's increase your operational efficiency.

TELEPHONY

Calls can be forwarded to the public telephone network and doors/gates can be opened at the push of a button.

SAFE OPERATOR TIME

Users can search for the right company or person and contact them directly. This saves a lot of time for the operators/reception staff as there is no need to forward or manage calls.

SYMPHONY BY COMMEND

THE WORLD'S FIRST INTERCOM CLOUD PLATFORM WITH PRIVACY AND SECURITY BY DESIGN

At Commend, Cyber Security is the core element of every single solution. Secure development is of greatest importance. That's why we focus on **PRIVACY AND SECURITY BY DESIGN**.

With Symphony your Solution benefits from the latest technology with highest cyber security standards. The Cloud services from Commend offer greatest flexibility combined with maximum efficiency.

- Latest technology - always up-to-date
- Highest security standards - ISO 27001 and IEC 62443
- Maximum flexibility for maximum efficiency
